```csharp
1  using System;
2  using System.IO;
3  public partial class _Default : System.Web.UI.Page
4  {
5      protected void Button1_Click(object sender, EventArgs e)
6      {
7          string savePath = @"c:\data\uploads\"; //make upload directory
8          if (FileUpload1.HasFile)
9          {
10             string fileName = FileUpload1.FileName;//get file name
11             savePath += fileName;//attach file name to save path
12             FileUpload1.SaveAs(savePath);//save file
13             sampLabel.Text = "<br>Your file was saved as " + fileName;
14         }
15         else
16         {
17             sampLabel.Text = "<br>You did not specify a file to upload.";
18         }
19         string sourceDirectory = @"C:\data\uploads"; //could also use savePath here
20         try
21         {
22             //list files using EnumerateFiles
23             var txtFiles = Directory.EnumerateFiles(sourceDirectory, "*.txt");
24             foreach (string currentFile in txtFiles) //display files
25                 sampLabel.Text += $"<br>{currentFile}";
26         }
27         //display any error messages
28         catch (Exception ex)
29         {
30             sampLabel.Text += ex.Message;
31         }
32     }
33 }
34
```
